Professional Summary

Results-driven Supply Chain and Logistics Specialist with solid experience in automotive and electronic manufacturing environments. Strong background in production planning, customer coordination, and ERP systems (SAP, Sage X3). Known for reliability, analytical thinking, and the ability to align customer demand with production and material availability.

Work Experience

Customer Service team Leader
Lear Corporation – Menzel Bourguiba
July 2026 – Present

- Manage customer demand and order fulfillment, ensuring on-time delivery and backlog follow-up.
- Act as the main interface between the customer and internal teams (Planning, Production, Logistics).
- Monitor customer KPIs such as delivery performance, backlog, premium freight, and service level.
- Lead escalation management and customer communication regarding shortages, delays, and recovery plans.

Supply Chain Specialist
October 2024 – June 2026

- Develop weekly and monthly production plans based on customer orders, forecasts, and material availability.
- Act as a key interface between production teams and customers to align delivery commitments.
- Analyze historical demand data to improve forecasting accuracy and capacity planning.
- Generate order tracking and performance reports using SAP and Excel.

Eleonetech – Electronic Manufacturing Services
September 2022 – September 2024

- Served as primary contact for customers regarding order status, delivery schedules, and supply chain issues.
- Managed customer orders, deliveries, and returns using Sage X3, ensuring data accuracy.
- Resolved delivery delays and quantity discrepancies with a customer-focused approach.
- Maintained high customer satisfaction through proactive communication and follow-up.

Product Planner Engineer
Sumitomo Electric Bordnetze Tunisia
January 2021 – September 2022

- Coordinated production workflows for multiple products.
- Supported production launch of new automotive projects.
- Contributed to optimization of production processes.
- Conducted analysis related to new project implementation.

Product Process Owner
Leoni Wiring Systems – Mateur Sud
March 2019 – December 2020

- Ensured traceability of ordered materials throughout the production process.
- Supported forecasting and technical releases in coordination with central PPE teams.
- Proposed short-term solutions for process and equipment constraints.
- Developed VB.NET applications to support quality, productivity, and continuous improvement.

IT System Administrator
Leoni Wiring Systems – Mateur Sud
March 2017 – March 2019

- Installed and maintained IT equipment in production environments.
- Managed system configuration, user accounts, and access control.
- Provided technical support and ensured system availability.
